## MT-96 8FT Folding Table

### Unfolding Instruction for Use

1. Open table by pushing Thumb-Latch in near handle and lay on level ground.
2. Turn the inside fixed legs out.
3. Fix the locking bar (which is used to fix the two table legs and make the long table keep steady when moving).
4. Do remember to fix the locking bar to tighten up the legs and ensure safety during use.
5. Turn over the table and shift the 2 elliptical fasteners onto the Y-shape support frame. This holds the legs in place to ensure safety during use.

### Folding Instruction for Storage

1. Place the table panel upside down on level ground.
2. Shift the 2 elliptical fasteners, loosen the nut, and disconnect the lock bar.
3. Fold the legs.
4. Close the 2 table panels into a case shape, making sure to leave the handle outside the case.
