

5. Lift the next shelf up and onto the four tubes sliding them through the corner holes of each shelf. Carefully slide the shelf down upon the sleeves (as in **Figure 5**).

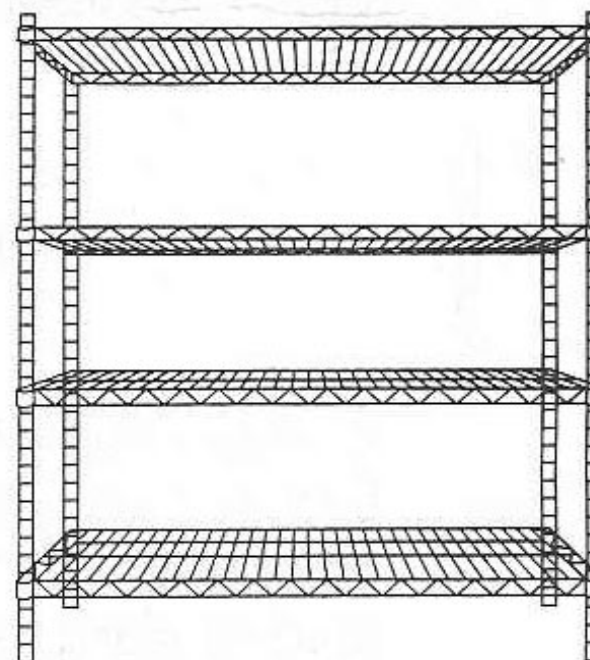

Figure 5

6. Repeat 4 and 5 for the next two shelves. Your system is now ready for use. Screw the plastic stand into the bottom to avoid scratching floor.

CAUTION:

- DO NOT STAND ON OR CLIMB ON THE SYSTEM.
- DO NOT DROP HEAVY ITEMS ON THE SYSTEM SHELVES.
- DO NOT PLACE LIGHTER ITEMS ON LOWER SHELVES AND HEAVIER ONES ON TOP.
- DO NOT MOVE SYSTEM WHILE LOADED.

**Cecilware Wire Shelving System
Assembly Instructions**
(Typical Four-Shelf Unit Shown)

Parts List:

1.	Tubes	4 pieces
2.	Plastic clips	16 Pairs
3.	Shelves	4 pieces

Assembly Instructions:

1. Select the desired height for the shelf. Shelves can be placed at any of the 1" circular grooves along the tube. Now take a pair of plastic clips into the groove you have selected, small side up (as in **Figure 1**).

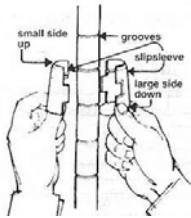

Figure 1

2. Holding a shelf on its side, slide the tube from the bottom of the shelf through one of the corner holes (as in **Figure 2**). The plastic clips will slide nicely into the shelf creating a "double wedge".

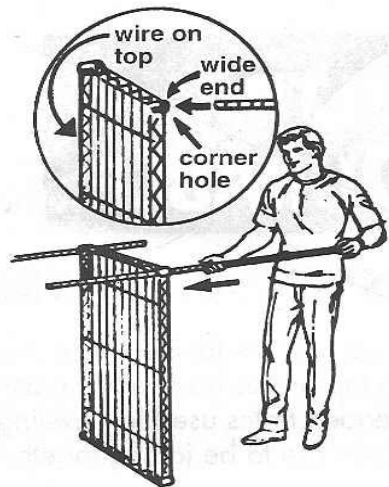

Figure 2

3. Once all four tubes have been slipped into a shelf, set the system upright, and press the bottom shelf firmly onto the clips (as in **Figure 3**).

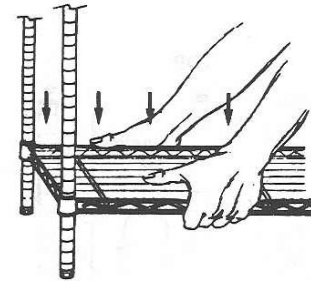

Figure 3

4. Select the placement of your next shelf by counting up the grooves to the desired height. Snap on other clips and repeat for each tube (as in **Figure 4**). NOTE: The shelf will not set properly if all the clips are not at the same level.
